P409-19

Is EEG service currently covered by a vendor-provided technician part of the current state (per 1.1, page 3)?

How many EEG cases are covered in the OR? How many in other departments?

- a. How many of these EEG cases are routine services?
- b. How many are long-term or continuous? What is the average length of long-term or continuous EEG cases?

Would the provider / offeror be supporting ambulatory, in-patient, and and/or emergent EEG requests?

Would the EEG Support be solely for technical services or is there a need for Professional (physician) support as well?

This requirement is speaking to ABI.

– Please clarify the maximum and average concurrencies of cases per day.

–
